

Reach (Registration, Evaluation, Authorisation and Restriction of chemicals)
Regulation (EC) Number 1907 (2006)

STATEMENT BY BELL BRUSH

Bell Brush can confirm that we are working with our suppliers of raw materials to ensure that Bell Brush products are in full compliance with the REACH legislation.

In line with REACH, which came into force across the EU in June 2007, the necessary pre-registration of chemical substances used in Bell Brush products has been carried out by our suppliers of raw materials.

This pre-registration is only applicable to 'substances' (the name used by REACH for chemical raw materials).

The products produced by Bell Brush are 'preparations' (blends of substances) and therefore do not need to be pre-registered themselves as part of REACH.

We shall continue to liaise with suppliers to ensure that they comply with the registration requirements set out by REACH for the coming years.
